Product Description

These HellermannTyton photovoltaic caution and power source markers are designed to meet the requirements of the National Electrical Code (NEC) International Fire Code (IFC) as well as being acceptable to the Authority Having Jurisdiction (AHJ). Coiled markers are pre-printed, non-adhesive and made of a UV stable vinyl. Markers can be opened and snapped over cables for long-term, reflective, permanent identification. Some pre-printed labels are printable using a thermal transfer printer when variable voltage or series data must be printed and displayed. Vinyl markers fit all standard PV cables or electrical metallic tubing (EMT) conduits.
